

Licences of Company

Licences for design documentation preparation for facilities for which a construction permit is issued by the Serbian ministry in charge of construction

Licence type:	Description of facilities:
P030G1, P030E4, P031M1, P031T1, P032M1, P032T1, P033M1, P033T1	Oil and gas processing facilities that are built out of exploitation fields following the previously obtained consent of the ministry responsible for exploitation of mineral resources (all licences), oil pipelines and oil product pipelines, gas pipelines of the nominal working pressure exceeding 16 bar if passes through the territory of two or more municipalities, tank farms for oil, liquefied petroleum gas and petroleum products with capacity over 500 tons built out of exploitation fields defined by the law governing mining and geological exploration (all licences), main hot water pipelines (all licences), production of biofuels and biotechnology in installations with a capacity exceeding 100 t per year (only P030G1 and P030E4 licences)
P040G1, P040E4, P040M3, P041T1, P042T1, P043T1, P044T1, P045T1, P046T1	Facilities of base and processing chemical industry (all licences), black and non-ferrous metallurgy (all licences), leather and fur processing facilities (all licences), rubber processing facilities (all licences), pulp and paper production facilities (all licences), and facilities for the processing of non-metallic mineral raw materials that are built out of exploitation fields defined by the law that regulates mining and geological exploration, except facilities for primary processing of ornamental and other stones (all licences)
P047G1, P047E4, P047M3, P047T1	Seveso plants and seveso complexes (all licences)
P052G1, P052E4	Thermal power plants with the capacity of 10 MW and more
P053G1, P053E4	Combined heat and power plants with the capacity of 10 MW and more
P100M1, P100T1	Facilities for treating hazardous waste by incineration, thermal and/or physical, physical-chemical, chemical processes, as well as central storages and/or landfills for hazardous waste (all licences)
P203G1	Facilities with height over 50m

Legend: **G1**-civil constructions; **M1**-thermotechnics, thermoenergetics, process and gas technics installations; **T1**-process; **E4**-electric motor drive-instrumentation; **M3**-transportation means, storages, mechanical constructions and technology
